Education

- M.Sc. Economics** Jul 2025 - Present
Indian Institute of Technology Kanpur (IITK), *CGPA: 7.86/10*
Relevant coursework: Econometrics, Economic Analysis, Machine Learning, Game Theory, Mathematical Finance
- B.Sc. (Hons.) Mathematics** Oct 2021 - Jun 2024
University of Delhi, *CGPA: 8.162/10*
Achievements: Prof. Savithri Singh Best UG Researcher Award | Saksham Puru Foundation Research Fellowship Award

Skills

- Quantitative Analysis:** Econometrics, Time Series, Statistical Inference, Risk Modeling, Business Analysis
- Programming & Data Tools:** Python, SQL, Excel (Power Query, Pivot Tables), Power BI, Tableau, Git/GitHub
- Analytics & ML:** Predictive Modeling, Dashboarding, KPI Reporting, Machine Learning, Clustering

Professional Experience

- Research Assistant** Dec 2025 - Present
Department of Economic Sciences, IIT Kanpur Kanpur, India
- Addressed strategic decision-making problems in Stackelberg game settings by developing optimization-based analyses for 2 research directions, supporting data-driven policy work.
 - Improved understanding of equilibrium computation in complex economic and operational systems by testing and comparing multiple optimization techniques for model reliability and interpretability.
 - Translated technical findings into presentation-ready outputs and documentation for academic stakeholders, supporting timely research communication.

- Research Analysis Intern** Sep 2024 - Jan 2025
Department of Electronics, ANDC, University of Delhi Delhi, India
- Improved evaluation of a large-scale STEM program by analyzing 1,100+ educational datasets using Python and SQL.
 - Reduced reporting turnaround time by 30% by building automated data pipelines and dashboards for stakeholder access.
 - Turned raw program data into actionable insights by collaborating with cross-functional teams on data requirements, benchmarks, and analysis.

Projects

- AI Execution Gap: Why Enterprise AI Projects Underperform** Feb 2026 - Mar 2026
- Identified why enterprise AI projects fail by analyzing 300 projects across 8 industries and 5 regions, covering outcomes from Failed to Succeeded.
 - Built dashboards and analytical summaries from 19 variables, including data readiness, leadership support, talent, change management, and governance, to explain outcome differences.
 - Synthesized project evidence from 2019–2024 to isolate the strongest organizational failure drivers and frame actionable recommendations.

- UPI Merchant Profitability & MDR Policy Simulation for India's Digital Payments Ecosystem** Nov 2025 - Dec 2025
- Analyzed 5+ years of NPCI and RBI payment data to assess profitability and sustainability across UPI ecosystem stakeholders.
 - Built scenario-based MDR pricing models (0%, 0.1%, 0.25%, tiered) to evaluate trade-offs between adoption, growth, and stakeholder profitability.
 - Developed a decision-support dashboard tracking transaction trends, costs, and profitability to recommend MDR strategies.

- Customer Segmentation – SME Client Strategy** Aug 2025 - Sep 2025
- Improved customer targeting by applying K-means clustering to 2,000+ SME records across 15+ financial and behavioral variables.
 - Built segment profiles using unsupervised learning to support campaign strategy for 5 customer groups.
 - Delivered dashboards and reports that improved targeting efficiency by 25% and increased campaign conversion rates by 22%.

Leadership and Activities

- Student Ambassador, Wolfram:** Promoted computational tools in STEM education and trained students in data and analytics workflows. Jun 2024 - Mar 2026
- President, SPIE Student Chapter, University of Delhi:** Led a cross-functional team of 150+ members and coordinated academic, industry, and outreach events. May 2023 - Jun 2024

Certifications

Business Analytics Specialization (Wharton) | Data Analytics Essentials (Cisco) | Machine Learning (Stanford)

Publications

- Innovative STEM pedagogies for teaching trigonometry and mensuration concepts, *Physics Education (IOP)*, 2025.
- Analysing the success of mega optics outreach program using mathematical methods, *MGM Publishing*, 2024.
